Re: Lakeshore East

Dear Mr. Warren:

Thank you for forwarding a copy of the document entitled "Survey Activities At 221 North Columbus Drive, Chicago Illinois." U.S. EPA's on-scene coordinator, Verneta Simon and health physicist, Larry Jensen had also requested the opportunity to analyze the soil samples collected from the boreholes. Could you please have your client make arrangements with Larry Jensen (886-5026) to transfer the soil samples to U.S. EPA at your client's earliest convenience? Your continued cooperation in this matter is certainly appreciated. Call me if you have any questions.

Sincerely,

Mary L. Fulghum
Associate Regional Counsel
